

Wetlands Bureau Decision Report

Review
2/3/14

Decisions Taken
01/27/2014 to 02/02/2014

DISCLAIMER:

This document is published for information purposes only and does not constitute an authorization to conduct work. Work in jurisdiction may not commence until the applicant has received a posting permit.

Decisions are subject to appeal, and are reviewed by the federal agencies for compliance with Section 404 of the Federal Clean Water Act.

APPEAL:

I. Any affected party may ask for reconsideration of a permit decision in accordance with RSA 482-A:10,II within 30 days of the Department's issuance of a decision. Requests for reconsideration should:

- 1) describe in detail each ground for complaint. Only grounds set forth in the request for reconsideration can be considered at subsequent levels of appeal;
- 2) provide new evidence or information to support the requested action;
- 3) Parties other than the applicant, the town, or contiguous abutters must explain why they believe they are affected; and
- 4) Be mailed to the DES Wetlands Bureau, PO Box 95, Concord, NH 03302-0095.

II. An appeal of a decision of the department after reconsideration may be filed with the Wetlands Council in accordance with RSA 482-A:10, IV within 30 days of the department's decision. Filing of the appeal must:

- 1) be made by certified mail to George "Chip" Kimball, Chairperson, Wetlands Council, PO Box 95, Concord, NH 03302-0095 (a copy should also be sent to the DES Wetlands Bureau);
- 2) contain a detailed description of the land involved in the department's decision; and
- 3) set forth every ground upon which it is claimed that the department's decision is unlawful or unreasonable.

MAJOR IMPACT PROJECT

2013-00853 LAKE HOUSES AT CHRISTMAS ISLAND LLC
LACONIA Lake Winnepesaukee

Requested Action:

Permanently remove an existing 4 ft. x 50 ft. seasonal pier and a 3.7 ft. x 39 ft. seasonal pier. Add a 3.5 ft. x 47 ft. seasonal center pier extension, two 3 ft. x 10.8 ft. seasonal finger piers, and two 3 ft. x 16 ft. seasonal fingers to the existing 3.9 ft x 47 ft permanent center pier with four existing finger piers measuring 3.6 ft. x 17.5 ft., 3.5 ft. x 17.5 ft., 1.7 ft. x 17.7 ft., and 1.7 ft. x 17.6 ft. attached to an 8 ft. x 35 ft. concrete structure at the shoreline on an average of 759 feet of shoreline frontage along Lake Winnepesaukee, in Laconia.

Conservation Commission/Staff Comments:

No comments from Con Com by June 04, 2013

APPROVE PERMIT:

Permanently remove an existing 4 ft. x 50 ft. seasonal pier and a 3.7 ft. x 39 ft. seasonal pier. Add a 3.5 ft. x 47 ft. seasonal center pier extension, two 3 ft. x 10.8 ft. seasonal finger piers, and two 3 ft. x 16 ft. seasonal fingers to the existing 3.9 ft x 47 ft permanent center pier with four existing finger piers measuring 3.6 ft. x 17.5 ft., 3.5 ft. x 17.5 ft., 1.7 ft. x 17.7 ft., and 1.7 ft. x 17.6 ft. attached to an 8 ft. x 35 ft. concrete structure at the shoreline on an average of 759 feet of shoreline frontage along Lake Winnepesaukee, in Laconia.

With Conditions:

1. All work shall be in accordance with plans by Rokeh Consulting LLC, as revised November 8, 2013, and received by the NH Department of Environmental Services (DES) on January 7, 2014.
2. No work is authorized to the additional existing 4 ft. x 24 ft. seasonal dock on the north of the shoreline.
3. This permit shall not be effective until it has been recorded with the county Registry of Deeds Office by the Permittee. A copy of the recorded permit shall be submitted to the DES Wetlands Bureau, by certified mail, return receipt requested, prior to construction.
4. No portion of the docking facility shall extend more than 95.6 feet from the shoreline at full lake elevation.
5. The existing seasonal docks shall be completely removed prior to the start of construction of the new docking structures.
6. This permit shall not preclude DES from taking any enforcement or revocation action if DES later determines that any of the structures depicted as "existing" on the plans submitted by the applicant were not previously permitted or grandfathered.
7. All construction related debris shall be placed outside of the jurisdiction of the DES Wetlands Bureau.
8. Appropriate siltation, erosion, and turbidity controls shall be in place prior to construction, maintained during construction, and shall remain until the area is stabilized.
9. Work authorized shall be carried out such that discharges in spawning or nursery areas during spawning seasons shall be avoided, and impacts to such areas shall be avoided or minimized to the maximum extent practicable during all times of the year.
10. Work shall be carried out in a time and manner such that disturbance to migratory waterfowl breeding areas and spawning areas shall be avoided.
11. These shall be the only structures on this water frontage and all portions of the docking structures shall be at least 20 ft. from abutting property lines or the imaginary extension of those lines into the water.
12. All seasonal structures shall be removed from the lake for the non-boating season.
13. All activities shall be in accordance with the Shoreland Water Quality Protection Act, RSA 483-B. The owner is responsible for obtaining any Shoreland Permit that may be required per RSA 483-B, for construction, excavation or fill that will occur within the Protected Shoreland.

With Findings:

1. This project is classified as a major project per Rule Env-Wt 303.02(d), construction of a docking facility providing 5 or more slips.
2. The applicant has an average of 759 feet of frontage along Lake Winnepesaukee.

3. A maximum of 11 slips may be permitted on this frontage per Rule Env-Wt 402.13, Frontage Over 75'.
4. The combined existing and proposed docking facilities will provide 19 slips as defined per RSA 482-A:2, VIII and therefore the structures fail to conform to Rule Env-Wt 402.13 and are subject to Rule Env-Wt 402.21, Modification of Existing Structures.
5. The modifications to the docking facilities will reduce the number of slips provided on the frontage by one and will result in less square feet of impact over public submerged lands than the existing docking structures, therefore the project meets Rule Env-Wt 402.21, Modification of Existing Structures.
6. Public hearing is waived with the finding that the project impacts will not significantly impair the resources of Lake Winnepesaukee.

-Send to Governor and Executive Council-

2013-01663 **CROCKETT, CHRISTINE**
PORTSMOUTH Sagamore Creek

Requested Action:

Fill 925 sq. ft. of freshwater wetland and installation of two 18" x 32' culverts with flared end sections to construct a driveway to access undeveloped upland tidal buffer zone to construct a single-family dwelling and impact 2,750 sq. ft. of undeveloped upland tidal buffer zone to construct a new dwelling on a single family lot.

Conservation Commission/Staff Comments:

9/4/13 Per DHR, no historic properties affected.

Inspection Date: 08/30/2013 by David A Price

APPROVE PERMIT:

Fill 925 sq. ft. of freshwater wetland and installation of two 18" x 32' culverts with flared end sections to construct a driveway to access undeveloped upland tidal buffer zone to construct a single-family dwelling and impact 2,750 sq. ft. of undeveloped upland tidal buffer zone to construct a new dwelling on a single family lot.

With Conditions:

1. All work shall be in accordance with revised plans by Ambit Engineering, Inc. dated December 5, 2013, as received by the NH Department of Environmental Services (DES) on December 6, 2013.
2. No more than 13.5% of the area of the lot within the protected shoreland shall be covered by impervious surfaces unless additional approval is obtained from DES.
3. At least 2,800 sq ft of the Natural Woodland Buffer beyond the primary building setback must remain in an unaltered state in order to comply with RSA 483-B:9, V, (b), (2).
4. All activities conducted in association with the completion of this project shall be conducted in a manner that complies with applicable criteria of Administrative Rules Chapter Env-Wq 1400 and RSA 483-B during and after construction.
5. There shall be no environmental impact to abutters from work within DES Wetlands jurisdiction.
6. Erosion and siltation control measures shall be installed prior to the start of work, be maintained throughout the project, and remain in place until all disturbed surfaces are stabilized.
7. Erosion and siltation controls shall be appropriate to the size and nature of the project and to the physical characteristics of the site, including slope, soil type, vegetative cover, and proximity to wetlands or surface waters.
8. No person undertaking any activity in the protected shoreland shall cause or contribute to, or allow the activity to cause or

- contribute to, any violations of the surface water quality standards established in Env-Ws 1700 or successor rules in Env-Wq 1700.
9. Any fill used shall be clean sand, gravel, rock, or other suitable material.
 10. Construction equipment shall be inspected daily for leaking fuel, oil and hydraulic fluid prior to entering jurisdictional areas.
 11. Faulty equipment shall be repaired prior to entering jurisdictional areas.
 12. The contractor shall have appropriate oil spill kits on site and readily accessible at all times during construction and each operator shall be trained in its use.

With Findings:

1. This project involves work within the undeveloped upland tidal buffer zone is therefore classified as a major impact project per Wt 303.02(b).
2. The need for the proposed impacts has been demonstrated by the applicant per Env-Wt 302.01. The applicant has demonstrated that the impacts are needed to access buildable uplands and to construct a single-family dwelling.
3. The applicant has provided evidence which demonstrates that this proposal is the alternative with the least adverse impact to areas and environments under the department's jurisdiction per Env-Wt 302.03. The applicant has designed the wetland crossing at the most narrow portion of the freshwater wetland and minimized slope impacts with stone retaining walls. Site grading has been designed to direct the impervious runoff away from abutting properties to a proposed rain garden to provide treatment prior to discharge, a drip apron is designed to infiltrate roof runoff, and proposed buffer plantings will provide increased wetland function and value along the project edge and provide screening to abutting properties, all of which will preserve the functions of the undeveloped tidal buffer zone.
4. The applicant has demonstrated by plan and example that each factor listed in Env-Wt 302.04(b) Requirements for Application Evaluation, has been considered in the design of the project. The NH Natural Heritage Bureau (NHB) has record of sensitive species within the vicinity of the project, but NHB does not expect impact to these species due to the natural vegetated buffer between the proposed project and tidal wetlands.
4. This approval is consistent with other approvals in undeveloped upland tidal buffer zone areas.
5. Adjacent waterfront properties have been developed similarly in relation to the tidal buffer zone.
6. The applicant obtained DES Shoreland Permit #2013-3319 for work within the jurisdiction of RSA 483-B, Shoreland Water Quality Protection Act. The wetlands permit is further conditioned to require compliance with RSA 483-B.
7. The applicant has demonstrated by plan and example that the proposal meets Env-Wt 803.06 for alternative compensatory mitigation proposals. The proposal will have a benefit to water quality, wildlife and their habitat by constructing a rain garden to provide treatment prior to discharge, a drip apron is designed to infiltrate roof runoff, and proposed buffer plantings will provide increased wetland function and value.
8. The applicant has attempted to get permission from the abutting property owner tax map/lot 224/10-11 for work in jurisdiction within 20 feet of their property line. They have declined.
9. The applicant has requested a waiver to Administrative Rule Env-Wt 304.04(a) "The department shall limit the location of a project to at least 20 feet from an abutting property line or imaginary extension thereof over surface water unless it receives written agreement from the affected abutter concurring with any impact that may result relative to the abutter's interests".
10. Abutting property owners tax map/lot 224/10-11 submitted comments stating that "any easement for them (applicant) would affect my enjoyment of the waterline greatly, as well as pose potential for sewage leakage etc. into the protected zone."
11. The applicant has demonstrated that the proposed dwelling will be serviced by municipal sewer and no documentation was submitted to DES to substantiate the potential for sewage leakage from the proposal. The applicant has proposed a landscape plan to provide extensive plantings along the property line of tax map/lot 224/10-11 to minimize visual impacts of the proposed project. The abutter also is a shorefront property owner and has direct physical and visual access to the tidal resource through his own property.
12. On August 30, 2013, DES conducted an inspection of the property and finds that the plans accurately reflect the site conditions.
13. The applicant has demonstrated that there will be no environmental impact to abutters and the work is conditional on no environmental impact to abutters.
14. There will be no adverse effect to the environment or natural resources of the state, public health, or public safety; or on abutting properties that is more significant than that which would result from complying with the Env-Wt 304.04.
15. The waiver is granted in accordance with Env-Wt 204.04(b), as strict compliance with the rule will provide no benefit to the public and will cause an operational or economic hardship to the applicant.
16. On July 19, 2013, DES received a letter from The Portsmouth Conservation Commission who recommended denial of the

project based on local regulations (City buffer ordinance), lack of detail on the plans including a full wetland delineation and lack of development detail of the property. The applicant has since revised the plans and submitted to DES and the Portsmouth Conservation Commission a full wetland delineation and a complete development proposal. No further comment was received from the Conservation Commission.

17. Public hearing is waived with the finding that the project impacts will not significantly impair the resources of this estuarine ecosystem.

2013-02154

PSNH

DEERFIELD

Requested Action:

Amendment requested to revise design of three structures that are located in standing water. PSNH will drive 5 foot diameter caissons into the bottom of the ponds for the poles to be set in the caissons. Impacts will result in an additional 1,470 sq. ft. of permanent fill, approximately 27,646 sq. ft. of temporary fill for access, and will be compensated through an additional in-lieu fee payment.

Conservation Commission/Staff Comments:

8/13/13 Per DHR, more info. requested.

8/23/13 DHR is requesting the final report as part of their more information needed comment.

APPROVE AMENDMENT:

Amend permit to read:

Dredge and fill 1,986 sq. ft. of permanent impacts to palustrine scrub-shrub, emergent wetlands and open water habitat for the installation of new or relocated structures associated with the PSNH D118 115kV Line Reconstruction Project to be completed within an existing 15-mile long transmission line ROW to maintain the reliability of PSNH's electrical delivery system in this region. Temporary impacts include a total of 290,252 sq. ft. of palustrine forested, scrub-shrub, and emergent wetlands, including intermittent and perennial streams and a pond, for construction access to existing and proposed transmission line structures. Compensatory mitigation is in the form of an additional one-time payment of \$5,153.90 to the DES Aquatic Resource Mitigation Fund.

With Conditions:

With amended conditions:

1. All work shall be in accordance with plans by Normandeau Associates, Inc. dated 8/2/2013, as received by the NH Department of Environmental Services (DES) on August 13, 2013.
2. The plan noting the final construction impacts for the stone islands with caisson foundation details and temporary access received by the DES on January 14, 2014 is a part of this permit amendment.
3. Any further alteration of areas on this property that are within the jurisdiction of the DES Wetlands Bureau will require a new application and/or further permitting by the Bureau.
4. Appropriate siltation/erosion/turbidity controls shall be in place prior to construction, shall be maintained during construction, and remain in place until the area is stabilized. Silt fence(s) must be removed once the area is stabilized.
5. Within three days of final grading or temporary suspension of work, all exposed soil areas shall be stabilized by seeding and mulching during the growing season, or if not within the growing season, by mulching with tack or netting and pinning on slopes steeper than 3:1.
6. Work shall be done during low flow.
7. Construction equipment shall be inspected daily for leaking fuel, oil and hydraulic fluid prior to entering surface waters or wetlands.
8. Faulty equipment shall be repaired prior to entering jurisdictional areas.
9. The contractor shall have appropriate oil spill kits on site and readily accessible at all times during construction and each operator shall be trained in its use.

10. All refueling of equipment shall occur outside of surface waters or wetlands.
11. This approval is contingent on receipt by DES of an additional one time payment of \$5,153.90 to the DES Aquatic Resource Mitigation (ARM) Fund. The payment shall be received by DES within 120 days of the date of the approval letter or the application will be denied.
12. The ARM Fund payment of \$5,153.90 shall be deposited in the Salmon Falls-Piscataqua River service area of the state.
13. The two parcels to be purchased by Bear-Paw Regional Greenway will be protected for conservation purposes and as a component of the compensatory mitigation for the proposed wetland loss.

With Findings:
Reaffirm findings

1. This is a major impact project per Administrative Rule Env-Wt 303.02(c), Projects that involve alteration of nontidal wetlands, nontidal surface waters, and banks adjacent to nontidal surface waters in excess of 20,000 square feet in the aggregate.
2. The need for the proposed impacts has been demonstrated by the applicant per Env-Wt 302.01.
3. The applicant has provided evidence which demonstrates that this proposal is the alternative with the least adverse impact to areas and environments under the department's jurisdiction per Env-Wt 302.03.
4. The applicant has demonstrated by plan and example that each factor listed in Env-Wt 302.04(a), Requirements for Application Evaluation, has been considered in the design of the project.
5. In accordance with RSA 482-A:8, DES finds that the requirements for a Prime Wetlands public hearing pursuant to RSA 482-A:15 do not apply as the permitted project: 1) is not of substantial public interest, and will not have a significant impact on or adversely affect the values of the palustrine resource, as identified under RSA 482-A:1 and 2) the project could not be relocated to avoid impacts on prime wetlands as the project is confined to a previously established public utility right-of-way.
6. The applicant has reviewed on-site options for mitigation and the department has determined that this project is acceptable for a combination of a payment to the Aquatic Resource Mitigation (ARM) Fund and permittee responsible mitigation through upland buffer preservation.
7. The protection of the Hooksett parcels includes extensive wetland and potential vernal pool habitat and is part of a large unfragmented block of land as mapped by the NH Fish & Game Wildlife Action Plan.
8. The two parcels of land in Hooksett totalling approximately 105 acres are proposed to be purchased as mitigation. The area abuts extensive existing conservation lands and includes a mix of wetland forest, open water, and upland forest areas in Tier 1 habitats as mapped by the Fish & Game Wildlife Action Plan.
9. The entire property lies within a conservation focus area identified in the 2010 NH Wildlife Action Plan map that is more than 20,000 acres in size. According to the WAP, NH requires a network of pennanently conserved lands that effectively represents the state's wildlife and habitat diversity.
10. In the event that Bear-Paw Regional Greenways cannot complete the conservation purchase, the DES ARM Fund will be receiving the mitigation payment for use in the Merrimack River watershed area.
11. The Department decision is issued in letter form and upon receipt of the ARM fund payment, the Department shall issue a posting permit in accordance with Env-Wt 803.08(f).

2013-02790 PSNH
CONCORD Unnamed Wetland

Requested Action:

Temporary construction impacts to a total of 49,630 sq. ft. of palustrine scrub-shrub and emergent wetlands and surface waters and 36 sq. ft. permanent impacts for three replacement structures for work associated with the thermal uprate of the existing PSNH 115kV P-145 transmission line within existing ROW.

APPROVE PERMIT:

Temporary construction impacts to a total of 49,630 sq. ft. of palustrine scrub-shrub and emergent wetlands and surface waters and 36 sq. ft. permanent impacts for three replacement structures for work associated with the thermal uprate of the existing PSNH 115kV P-145 transmission line within existing ROW.

With Conditions:

1. All work shall be in accordance with plans by GZA GeoEnvironmental, Inc. dated September 2013, as received by the NH Department of Environmental Services (DES) on October 10, 2013.
2. Any further alteration of areas on this property that are within the jurisdiction of the DES Wetlands Bureau will require a new application and/or further permitting by the Bureau.
3. Appropriate siltation/erosion/turbidity controls shall be in place prior to construction, shall be maintained during construction, and remain in place until the area is stabilized. Silt fence(s) must be removed once the area is stabilized.
4. Replacement of structures occurring at Turtletown Pond must be coordinated with the NH Fish & Game Department to determine appropriate time-of-year for work in the pond to avoid disturbance of hibernating or active turtles at this location.

With Findings:

1. This is a major impact project per Administrative Rule Env-Wt 303.02(c).
2. The need for the proposed impacts has been demonstrated by the applicant per Env-Wt 302.01.
3. The applicant has provided evidence which demonstrates that this proposal is the alternative with the least adverse impact to areas and environments under the department's jurisdiction per Env-Wt 302.03.
4. The applicant has demonstrated by plan and example that each factor listed in Env-Wt 302.04(a), Requirements for Application Evaluation, has been considered in the design of the project.
5. In accordance with RSA 482-A:8, DES finds that the requirements for a public hearing do not apply as the permitted project is not of substantial public interest, and will not have a significant impact on or adversely affect the values of the palustrine resource, as identified under RSA 482-A:1.

MINOR IMPACT PROJECT

2013-02300 BOYLE, CORNELIA
NEW LONDON Little Sunapee Lake

Requested Action:

Dredge no more than 11 cubic yards of material and road debris washed into the waterbody during storm events from 1,890 sq. ft. of the bed of Little Sunapee Lake, in New London.

Conservation Commission/Staff Comments:
Con Com signed Wet application

APPROVE PERMIT:

Dredge no more than 11 cubic yards of material and road debris washed into the waterbody during storm events from 1,890 sq. ft. of the bed of Little Sunapee Lake, in New London.

With Conditions:

1. All work shall be in accordance with plans as received by the NH Department of Environmental Services (DES) on December 24, 2013.

2. Dredged material shall be placed outside of the jurisdiction of the DES Wetlands Bureau.
3. Work shall be done during drawdown.
4. This permit does not allow wheeled or tracked equipment to operate on the lakebed. All equipment shall be located on the shoreline and above full lake elevation.
5. Dredge depth shall not extend below the original lakebed contours.
6. Appropriate siltation and erosion controls shall be in place prior to construction, shall be maintained during construction, and remain in place until the area is stabilized. Silt fence(s) must be removed once the area is stabilized.
7. Appropriate turbidity controls shall be installed prior to construction, shall be maintained during construction such that no turbidity escapes the immediate dredge area, and shall remain until suspended particles have settled and the water at the work site has returned to normal clarity.
8. The dredge area shall be regraded to original contours and restored to original conditions following completion of work.
9. All activities shall be in accordance with the Shoreland Water Quality Protection Act, RSA 483-B. The owner is responsible for obtaining any Shoreland Permit that may be required per RSA 483-B, for construction, excavation or fill that will occur within the Protected Shoreland.

With Findings:

1. This is a minor impact project per Administrative Rule Env-Wt 303.03 (g), removal of no more than 20 cubic yards of rock, gravel, sand, mud, or other materials from public waters.
2. The need for the proposed impacts has been demonstrated by the applicant per Env-Wt 302.01.
3. The applicant has provided evidence which demonstrates that this proposal is the alternative with the least adverse impact to areas and environments under the department's jurisdiction per Env-Wt 302.03.
4. The applicant has demonstrated by plan and example that each factor listed in Env-Wt 302.04(a) Requirements for Application Evaluation, has been considered in the design of the project.

2013-03311 NH DEPT OF TRANSPORTATION
LEE Unnamed Wetland

Requested Action:

Reconfigure the existing Traffic Circle to a Roundabout adding a travel lane, construct a recharge drainage structure and a treatment swale, reconstruct the approaches and construct cantilevered sign structures impacting 3,974 sq. ft. (1,225 sq. ft. temporary) of palustrine wetlands.

Conservation Commission/Staff Comments:

Cons. Comm. - no comment

River Advisory Comm. - no comment

APPROVE PERMIT:

Reconfigure the existing Traffic Circle to a Roundabout adding a travel lane, construct a recharge drainage structure and a treatment swale, reconstruct the approaches and construct cantilevered sign structures impacting 3,974 sq. ft. (1,225 sq. ft. temporary) of palustrine wetlands. NHDOT project #15692

With Conditions:

1. All work shall be in accordance with plans by NHDOT Bureau of Highway Design, as received by the Department on Dec. 11, 2013.
2. Dredged material shall be placed out of the DES Wetlands Bureau jurisdiction.
3. Construction equipment shall not be located within surface waters.
4. Discharge from dewatering of work areas shall be to sediment basins that are: a) located in uplands; b) lined with hay bales or other acceptable sediment trapping liners; and c) set back as far as possible from wetlands and surface waters, in all cases with a

minimum of 20 feet of undisturbed vegetated buffer.

5. Appropriate siltation/erosion/turbidity controls shall be in place prior to construction, shall be maintained during construction, and shall remain until the area is stabilized.
6. Within three days of the last activity in an area, all exposed soil areas, where construction activities are complete, shall be stabilized by seeding and mulching during the growing season, or if not within the growing season, by mulching with tack on slopes steeper than 3:1 or netting /matting and pinning on slopes steeper than 2:1.
7. Where construction activities have been temporarily suspended within the growing season, all exposed soil areas shall be stabilized within 14 days by seeding and mulching or if temporarily suspended outside the growing season, all exposed areas shall be stabilized within 14 days by mulching, mulching with tack on slopes steeper than 3:1 and stabilized by matting and pinning on slopes steeper than 2:1.
8. The contractor responsible for completion of the work shall utilize techniques described in the New Hampshire Stormwater Manual, Volume 3, Erosion and Sediment Controls During Construction (December 2008).
9. Extreme precautions to be taken within riparian areas to limit unnecessary removal of vegetation during road construction and areas cleared of vegetation to be revegetated as quickly as possible.
10. There shall be no further alteration to wetlands or surface waters without amendment of this permit.
11. Standard precautions shall be taken to prevent import or transport of soil or seed stock from nuisance, invading species such as purple loosestrife or Phragmites.
12. The impacts associated with the temporary work shall be restored immediately following construction.

With Findings:

1. This is a minor impact project per Administrative Rule Env-Wt 303.03(h), alteration of less than 20,000 sq. ft. of non-tidal wetlands.
2. The need for the proposed impacts has been demonstrated by the applicant per Env-Wt 302.01.
3. The applicant has provided evidence which demonstrates that this proposal is the alternative with the least adverse impact to areas and environments under the department's jurisdiction per Env-Wt 302.03.
4. The applicant has demonstrated by plan and example that each factor listed in Env-Wt 302.04(a) Requirements for Application Evaluation, has been considered in the design of the project.
5. The project was coordinated and discussed at the monthly Natural Resource Agency meetings held at the NH Dept. of Transportation.
6. It is not expected that the project will have any impact on the Natural Heritage Bureau record.

2013-03372

LESLEY ANN BRAR REVOCABLE LIVING TRUST

MEREDITH Lake Winnepesaukee

Requested Action:

Retain a 6 ft. x 10 ft. extension to the existing 6 ft. x 30 ft. permanent dock to create a 6 ft. x 40 ft. crib dock, install a 6 ft. x 45 ft. seasonal dock to be connected to the existing dock by a 6 ft. x 12 ft. seasonal walkway in a "U" configuration on an average of 225 feet of shoreline frontage on Bear Island, Lake Winnepesaukee, in Meredith.

Conservation Commission/Staff Comments:

Con Com did not sign Wet application

1/16/14 Per DHR, no historic properties affected.

APPROVE PERMIT:

Retain a 6 ft. x 10 ft. extension to the existing 6 ft. x 30 ft. permanent dock to create a 6 ft. x 40 ft. crib dock, install a 6 ft. x 45 ft. seasonal dock to be connected to the existing dock by a 6 ft. x 12 ft. seasonal walkway in a "U" configuration on an average of 225 feet of shoreline frontage on Bear Island, Lake Winnepesaukee, in Meredith.

With Conditions:

1. All work shall be in accordance with plans by Ames Associates dated December 3, 2013, as received by the NH Department of

Environmental Services (DES) on December 20, 2013.

2. This permit shall not be effective until it has been recorded with the county Registry of Deeds Office by the Permittee. A copy of the recorded permit shall be submitted to the DES Wetlands Bureau by certified mail, return receipt requested, prior to installation.
3. This shall be the only structure on this water frontage and all portions of the docking structure shall be at least 20 ft. from abutting property lines or the imaginary extension of those lines into the water.
4. The seasonal pier shall be removed from the lake for the non-boating season.
5. No portion of the seasonal pier shall extend more than 45 feet from the shoreline at full lake elevation.
6. All activities shall be in accordance with the Shoreland Water Quality Protection Act, RSA 483-B. The owner is responsible for obtaining any Shoreland Permit that may be required per RSA 483-B, for construction, excavation or fill that will occur within the Protected Shoreland.

With Findings:

1. This is a minor impact project per Administrative Rule Env-Wt 303.03(d), construction or modification of a 3 slip docking system.
2. The need for the proposed impacts has been demonstrated by the applicant per Env-Wt 302.01.
3. The applicant has provided evidence which demonstrates that this proposal is the alternative with the least adverse impact to areas and environments under the department's jurisdiction per Env-Wt 302.03.
4. The applicant has demonstrated by plan and example that each factor listed in Env-Wt 302.04(a) Requirements for Application Evaluation, has been considered in the design of the project.
5. The applicant has an average of 225 feet of shoreline frontage along Lake Winnepesaukee.
6. A maximum of 4 slips may be permitted on this frontage per Rule Env-Wt 402.13, Frontage Over 75'.
7. The proposed docking facility will provide 3 slips as defined per RSA 482-A:2, VIII and therefore meets Rule Env-Wt 402.13.

MINIMUM IMPACT PROJECT

2013-02807 PSNH
BOW Merrimack River

Requested Action:

Temporary construction impacts to a total of 1,250 sq. ft. of palustrine scrub-shrub and emergent wetlands for work associated with the thermal uprate of the existing PSNH 115kV P-145 transmission line within existing ROW.

APPROVE PERMIT:

Temporary construction impacts to a total of 1,250 sq. ft. of palustrine scrub-shrub and emergent wetlands for work associated with the thermal uprate of the existing PSNH 115kV P-145 transmission line within existing ROW.

With Conditions:

1. All work shall be in accordance with plans by GZA GeoEnvironmental, Inc. dated September 2013, as received by the NH Department of Environmental Services (DES) on October 11, 2013.
2. Any further alteration of areas on this property that are within the jurisdiction of the DES Wetlands Bureau will require a new application and/or further permitting by the Bureau.
3. Appropriate siltation/erosion/turbidity controls shall be in place prior to construction, shall be maintained during construction, and remain in place until the area is stabilized. Silt fence(s) must be removed once the area is stabilized.

With Findings:

1. This is a minimum impact project per Administrative Rule Env-Wt 303.04(f).
2. The need for the proposed impacts has been demonstrated by the applicant per Env-Wt 302.01.

3. The applicant has provided evidence which demonstrates that this proposal is the alternative with the least adverse impact to areas and environments under the department's jurisdiction per Env-Wt 302.03.
4. The applicant has demonstrated by plan and example that each factor listed in Env-Wt 302.04(b) Requirements for Application Evaluation, has been considered in the design of the project.

2013-03371

SKINNER, CRAIG

MEREDITH Lake Winnepesaukee

Requested Action:

Relocate an existing 3 pile ice cluster adjacent to a "W" shaped docking facility consisting of an 8 ft. x 20 ft. pier, a 4 ft. x 22 ft. pier, and a 4 ft. x 20 ft. pier connected by a 10 ft. x 39 ft. 6 in. walkway accessed by a 3 ft. 6 in. by 5 ft. concrete pad also with a 14 ft. x 24 ft. crib supported dock accessed by a 7 ft. x 22 ft. walkway, on an average 271 feet of frontage on Lake Winnepesaukee.

Conservation Commission/Staff Comments:
Con Com did not sign Wet application

APPROVE PERMIT:

Relocate an existing 3 pile ice cluster adjacent to a "W" shaped docking facility consisting of an 8 ft. x 20 ft. pier, a 4 ft. x 22 ft. pier, and a 4 ft. x 20 ft. pier connected by a 10 ft. x 39 ft. 6 in. walkway accessed by a 3 ft. 6 in. by 5 ft. concrete pad also with a 14 ft. x 24 ft. crib supported dock accessed by a 7 ft. x 22 ft. walkway, on an average 271 feet of frontage on Lake Winnepesaukee.

With Conditions:

1. All work shall be in accordance with plans by Winnepesaukee Marine Construction dated December 18, 2013, as received by the NH Department of Environmental Services (DES) on December 20, 2013.
2. This permit shall not be effective until it has been recorded with the county Registry of Deeds Office by the Permittee. A copy of the recorded permit shall be submitted to the DES Wetlands Bureau, by certified mail, return receipt requested, prior to construction.
3. The repairs shall maintain the size, location and configuration of the pre-existing structures.
4. This permit to replace or repair existing structures shall not preclude the DES from taking any enforcement action or revocation action if the DES later determines that the structures represented as "existing" were not previously permitted or grandfathered.
5. All construction related debris shall be placed outside of the jurisdiction of the DES Wetlands Bureau.
6. Appropriate siltation, erosion, and turbidity controls shall be in place prior to construction, maintained during construction, and shall remain until the area is stabilized.
7. Work authorized shall be carried out such that discharges in spawning or nursery areas during spawning seasons shall be avoided, and impacts to such areas shall be avoided or minimized to the maximum extent practicable during all times of the year.
8. Work shall be carried out in a time and manner such that disturbance to migratory waterfowl breeding areas and spawning areas shall be avoided.
9. All activities shall be in accordance with the Shoreland Water Quality Protection Act, RSA 483-B. The owner is responsible for obtaining any Shoreland Permit that may be required per RSA 483-B, for construction, excavation or fill that will occur within the Protected Shoreland.

With Findings:

1. This project is deemed to be a minimum project per Rule Env-Wt 303.03(o).
2. The applicant has an average of 271 feet of frontage along Lake Winnepesaukee.
4. A maximum of 4 slips may be permitted on this frontage per Rule Env-Wt 402.13, Frontage Over 75'.
5. The proposed docking facility will provide 6 slips as defined per RSA 482-A:2, VIII and therefore exceeds Rule Env-Wt 402.13.
6. The proposed modification does not add any new slips to the existing docking structure.
7. The proposed relocation of the ice cluster should provide better protection to the docking structure from ice damage.

CSPA PERMIT

2013-02066 **WALLACE, ROBERT**
ENFIELD **Crystal Lake**

Requested Action:

AMENDMENT DESCRIPTION: Owner wishes to expand the propose addition from 20ft x 38ft to 30ft x 38ft.

APPROVE AMENDMENT:

Impact 5,715 sq ft in order to add a 30ft x 38ft addition to an existing structure, grade driveway, and install stormwater drainage.

With Conditions:

1. All work shall be in accordance with revised plans by Riverside Ecological dated January 13, 2014 and received by the NH Department of Environmental Services (DES) on January 14, 2014.
2. No more than 12.0% of the area of the lot within the protected shoreland shall be covered by impervious surfaces unless additional approval is obtained from DES.
3. At least 3,625 sq ft of the Natural Woodland Buffer beyond the primary building setback must remain in an unaltered state in order to comply with RSA 483-B:9, V, (b), (2).
4. All activities conducted in association with the completion of this project shall be conducted in a manner that complies with applicable criteria of Administrative Rules Chapter Env-Wq 1400 and RSA 483-B during and after construction.
5. Erosion and siltation control measures shall be installed prior to the start of work, be maintained throughout the project, and remain in place until all disturbed surfaces are stabilized.

6. Erosion and siltation controls shall be appropriate to the size and nature of the project and to the physical characteristics of the site, including slope, soil type, vegetative cover, and proximity to wetlands or surface waters.
7. No person undertaking any activity in the protected shoreland shall cause or contribute to, or allow the activity to cause or contribute to, any violations of the surface water quality standards established in Env-Ws 1700 or successor rules in Env-Wq 1700.
8. Any fill used shall be clean sand, gravel, rock, or other suitable material.
9. This permit shall not preclude DES from taking any enforcement or revocation action if DES later determines that any of the structures depicted as "existing" on the plans submitted by the applicant were not previously permitted or grandfathered.

2014-00084 DUPILLE, LEONARD
MOULTONBOROUGH Lake Winnepesaukee

Requested Action:

Impact 59 sq ft in order to add a bump out to the side of the existing structure.

APPROVE PERMIT:

Impact 59 sq ft in order to add a bump out to the side of the existing structure.

With Conditions:

1. All work shall be in accordance with plans by Leonard L. Dupille dated January 9, 2014 and received by the NH Department of Environmental Services (DES) on January 10, 2014.
2. No more than 14.5% of the area of the lot within the protected shoreland shall be covered by impervious surfaces unless additional approval is obtained from DES.
3. All activities conducted in association with the completion of this project shall be conducted in a manner that complies with applicable criteria of Administrative Rules Chapter Env-Wq 1400 and RSA 483-B during and after construction.
4. Erosion and siltation controls shall be appropriate to the size and nature of the project and to the physical characteristics of the site, including slope, soil type, vegetative cover, and proximity to wetlands or surface waters.
5. No person undertaking any activity in the protected shoreland shall cause or contribute to, or allow the activity to cause or contribute to, any violations of the surface water quality standards established in Env-Ws 1700 or successor rules in Env-Wq 1700.
6. Any fill used shall be clean sand, gravel, rock, or other suitable material.
7. This permit shall not preclude DES from taking any enforcement or revocation action if DES later determines that any of the structures depicted as "existing" on the plans submitted by the applicant were not previously permitted or grandfathered.

2014-00135 SCOTT A EVERETT LIVING TRUST
LACONIA Lake Winnepesaukee

Requested Action:

Impact 1,420 sq ft in order to construct an accessory structure extending into the waterfront buffer and replace existing walkway with pervious asphalt.

APPROVE PERMIT:

Impact 1,420 sq ft in order to construct an accessory structure extending into the waterfront buffer and replace existing walkway with pervious asphalt.

With Conditions:

1. All work shall be in accordance with plans by Nobis Engineering, Inc. dated January 14, 2014 and received by the NH Department of Environmental Services (DES) on January 15, 2014.
2. The accessory structure, more specifically, the deck, expanding into the Waterfront Buffer shall not be connected to the primary structure.

3. All pervious technologies used shall be designed, installed and maintained to effectively absorb and infiltrate stormwater.
4. No more than 35.71% of the area of the lot within the protected shoreland shall be covered by impervious surfaces unless additional approval is obtained from DES.
5. Erosion and siltation controls shall be appropriate to the size and nature of the project and to the physical characteristics of the site, including slope, soil type, vegetative cover, and proximity to wetlands or surface waters.
6. All activities conducted in association with the completion of this project shall be conducted in a manner that complies with applicable criteria of Administrative Rules Chapter Env-Wq 1400 and RSA 483-B during and after construction.
7. No person undertaking any activity in the protected shoreland shall cause or contribute to, or allow the activity to cause or contribute to, any violations of the surface water quality standards established in Env-Ws 1700 or successor rules in Env-Wq 1700.
8. Any fill used shall be clean sand, gravel, rock, or other suitable material.
9. This permit shall not preclude DES from taking any enforcement or revocation action if DES later determines that any of the structures depicted as "existing" on the plans submitted by the applicant were not previously permitted or grandfathered.

2014-00154 BRUHM, DAVID
ALTON Lake Winnepesaukee

Requested Action:

Impact 2,600 sq ft in order to construct a garage 235 feet from the shoreline.

APPROVE PERMIT:

Impact 2,600 sq ft in order to construct a garage 235 feet from the shoreline.

With Conditions:

1. All work shall be in accordance with plans by David L. Bruhm dated January 6, 2014 and received by the NH Department of Environmental Services (DES) on January 16, 2014.
2. No more than 24.04% of the area of the lot within the protected shoreland shall be covered by impervious surfaces unless additional approval is obtained from DES.
3. All activities conducted in association with the completion of this project shall be conducted in a manner that complies with applicable criteria of Administrative Rules Chapter Env-Wq 1400 and RSA 483-B during and after construction.
4. Erosion and siltation controls shall be appropriate to the size and nature of the project and to the physical characteristics of the site, including slope, soil type, vegetative cover, and proximity to wetlands or surface waters.
5. No person undertaking any activity in the protected shoreland shall cause or contribute to, or allow the activity to cause or contribute to, any violations of the surface water quality standards established in Env-Ws 1700 or successor rules in Env-Wq 1700.
6. Any fill used shall be clean sand, gravel, rock, or other suitable material.
7. This permit shall not preclude DES from taking any enforcement or revocation action if DES later determines that any of the structures depicted as "existing" on the plans submitted by the applicant were not previously permitted or grandfathered.

2014-00171 WELLS, BRIAN/ROBERTA
SANBORNTON Winnisquam Lake

Requested Action:

Impact 1,813 sq ft in order to construct a pervious walkway and pavers patio located on the northwest side of primary structure, construct a patio and two walkways on the lakeside, and install multiple rain gardens and planting areas.

APPROVE PERMIT:

Impact 1,813 sq ft in order to construct a pervious walkway and pavers patio located on the northwest side of primary structure, construct a patio and two walkways on the lakeside, expand driveway, and install multiple rain gardens and planting areas.

With Conditions:

1. All work shall be in accordance with plans by Stoney Ridge Environmental, LLC dated September 27, 2013 and received by the NH Department of Environmental Services (DES) on January 17, 2014.
2. No more than 28.3% of the area of the lot within the protected shoreland shall be covered by impervious surfaces unless additional approval is obtained from DES.
3. All activities conducted in association with the completion of this project shall be conducted in a manner that complies with applicable criteria of Administrative Rules Chapter Env-Wq 1400 and RSA 483-B during and after construction.
4. Erosion and siltation controls shall be appropriate to the size and nature of the project and to the physical characteristics of the site, including slope, soil type, vegetative cover, and proximity to wetlands or surface waters.
5. No person undertaking any activity in the protected shoreland shall cause or contribute to, or allow the activity to cause or contribute to, any violations of the surface water quality standards established in Env-Ws 1700 or successor rules in Env-Wq 1700.
6. Any fill used shall be clean sand, gravel, rock, or other suitable material.
7. This permit shall not preclude DES from taking any enforcement or revocation action if DES later determines that any of the structures depicted as "existing" on the plans submitted by the applicant were not previously permitted or grandfathered.

CSPA PERMIT W/WAIVER

2008-02479 WEISS, JAY
WOLFEBORO Lake Winnepesaukee

Requested Action:

Request permit time extension.

APPROVE TIME EXTENSION:

Impact 2,500 sq ft for the purpose of expanding an existing non-conforming primary structure.

WAIVER APPROVED: RSA 483-B:9, II(b) is waived to allow the expansion of a primary structure that encroaches upon the primary building setback.

With Conditions:

1. All work shall be in accordance with plans by Ames Associates, dated September 19, 2008 and received by the Department of Environmental Services ("DES") on November 14, 2008.
2. This approval includes a waiver of RSA 483-B:9, II (b) and, therefore, shall not be effective until it has been recorded at the appropriate Registry of Deeds and a copy of the recorded waiver is sent to the department by certified mail, return receipt requested.
3. No more than 29% of the area of the lot within the protected shoreland shall be covered by impervious surfaces unless additional approval is obtained from DES.
4. Orange construction fencing shall be placed at the limits of construction to prevent accidental encroachment on areas determined to remain in an unaltered state.
5. No areas currently in an unaltered state may be disturbed by this project. All of the remaining 3,248 sq ft of the Natural Woodland Buffer beyond the primary building setback must remain in an unaltered state in order to comply with RSA 483-B:9, V,(b),(2).
6. All activities conducted in association with the completion of this project shall be conducted in a manner that complies with applicable criteria of Administrative Rules Chapter Env-Wq 1400 and RSA 483-B during and after construction.
7. Erosion and siltation control measures shall be installed prior to the start of work, be maintained throughout the project, and remain in place until all disturbed surfaces are stabilized.
8. Erosion and siltation controls shall be appropriate to the size and nature of the project and to the physical characteristics of the

site, including slope, soil type, vegetative cover, and proximity to wetlands or surface waters.

9. No person undertaking any activity in the protected shoreland shall cause or contribute to, or allow the activity to cause or contribute to, any violations of the surface water quality standards established in Env-Ws 1700 or successor rules in Env-Wq 1700.

10. Any fill used shall be clean sand, gravel, rock, or other suitable material.

11. The contractor responsible for completion of the work shall utilize techniques described in the DES Best Management Practices for Urban Stormwater Runoff Manual (January, 1996) and the Stormwater Management and Erosion and Sediment Control Handbook for Urban and Developing Areas in New Hampshire (August, 1992).

12. Within three days of final grading or temporary suspension of work in an area that is in or adjacent to wetlands or surface waters, all exposed soil areas shall be stabilized by seeding and mulching during the growing season, or if not within the growing season, by mulching with tack or netting and pinning on slopes steeper than 3:1.

13. Silt fencing must be removed once the area is stabilized.

With Findings:

1. The owner, authorized agent or applicant certifies that this permit qualifies for a permit extension in accordance with RSA 483-B:5-b, VI and Env-Wq 1406.19.

2. This permit has been extended in accordance with RSA 483-B:5-b, VI and Env-Wq 1406.19.
